Catalog 2018

Welcome to the World of Märklin my world!

The **Märklin my world** world of railroading offers an age-appropriate entry into the world of railroading with the proven **Märklin** quality. The locomotives and cars are designed for children, are easy to handle, and offer all kinds of play fun right from the start.

The extensive assortment of track and accessories offers endless creative possibilities for getting involved in the world of railroading and experiencing reality in a reduced size! The **Märklin my world** trains are built in H0 Gauge to a scale of 1:87 and they can even be run on Dad or Granddad's model railroad layout..

HIGHlights

- Complete world of railroading with many accessories.
- All of the trains are rechargeable battery or battery powered and include light and sound functions!
- Sturdy childproof construction and design of the trains!
- Independent playing with several trains at the same time!
- Magnet couplers designed for children on all of the locomotives and cars.
- Batteries included.
- Immense, expandable track system!
- Extremely sturdy, tough track!
- Setup and take down of the track is easy as child's play!
- Reliable operation even on a carpet.
- All of the trains are H0 Gauge / 1:87 and therefore usable on all H0 layouts!
- Suitable for kindergarten aged children.

3+

märklin
my world

2 Plastic Track Crossing

This is a set consisting of two track crossings that add many setup possibilities to the my world track assortment. The my world track sections are made of sturdy plastic just right for children.

The perfect duo for every railroad with the signal (Item No. 72201)!

Crisscrossing your room!

Now your trains crisscross your room and thanks to the crossings, you can build all kinds of new routes.

FAQ Questions about Märklin my world

1) Which batteries are needed for the battery trains and are they included with the trains?

The battery-operated starter sets each need 4 each 1.5 volt Mignon AA batteries and 2 each 1.5 volt Micro AAA batteries for the train controller and for the train itself. These batteries are included in the sets. On the rechargeable battery-operated starter sets 2 each 1.5 volt Micro AAA batteries for the train controller (Märklin Power Control Stick) and a mini USB cable are needed. These items are included in the sets. The batteries included are not rechargeable batteries.

2) Can rechargeable batteries also be used?

Rechargeable batteries can also be used in the battery holder in addition to regular batteries. When doing this, please note the operating instructions for the charging device being used. A mini USB charging cable for recharging the train is included in the sets for trains with rechargeable battery operation.

3) How can I expand a battery starter set in a useful way?

The plastic track extension set (item number 23300) with its preplanned contents offers an easy way to expand a starter set. This track extension set offers different ways to expand or set up a layout. In addition, there are also different individual sections of track, turnouts, and track bumpers. The plastic track can also be used and expanded with the Märklin C Track. This allows you to plan and add to track layouts of your own design. Car sets, individual cars, and accessories round out the theme of railroading and round out the various ways to expand.

4) Can the battery trains also be used on large digital layouts, such as those of my father or grandfather?

Since the battery or rechargeable battery trains have their own power supply inside the train, they can also be used on larger layouts with no problem, regardless of whether the layout is being operated analog or digital. In order to avoid collisions, you must remember that several trains cannot be running at the same time on the same track.

5) How does the Märklin my world Elevated Railroad work?

The new Märklin my world Elevated Railroad in the proven Märklin quality offers great play fun by playing on two levels. The building blocks are used to build the Elevated Railroad pillars in different heights thus resulting in a grade to take the track to the higher Level 1. The track goes from Level 1 by means of a descending grade back to Level 0. The track sections and blocks are made of sturdy plastic designed for children.

6) How are Märklin my world trains controlled?

There are two different types of remote control. The handy wireless infrared remote control with 3 speed levels that can be used to control the light function and sounds. This is also equipped with two frequencies that allow you to control two trains. These trains must have however the same frequencies. Their special shape makes them especially good for children's hands. The second control unit is the wireless Märklin Power Control Stick designed for children. This infrared locomotive controller also has 3 speed levels forward and reverse, as well as 3 sound functions (such as a steam function on a steam locomotive), and control of dual headlights.
